Georgia-Pacific Chemicals

RESI-BOOST® Adhesive Technology

Jeffrey Otjen & Steve Ashley

Georgia-Pacific Chemicals LLC

PELICE CONFERENCE

4-13-2018

RESI-BOOST

bonds that last. | advancements that work.™

RESI-BOOST® Adhesive Technology
Key Benefits

- *Lower Resin Usage*
- *Decreased Cycle Time*
- *Increased bonding around knots and juvenile wood*
- *Downfall Reduction*
- *Prepress Consolidation*
- *Product Application*

RESI-BOOST

RESI-BOOST® Adhesive Technology
Field Testing ½" 4-Plies

Field Testing ½" 4-Plies

RESI-BOOST

RESI-BOOST® Adhesive Technology
Lower Resin Usage

Georgia-Pacific Chemicals

Reduction in spread levels

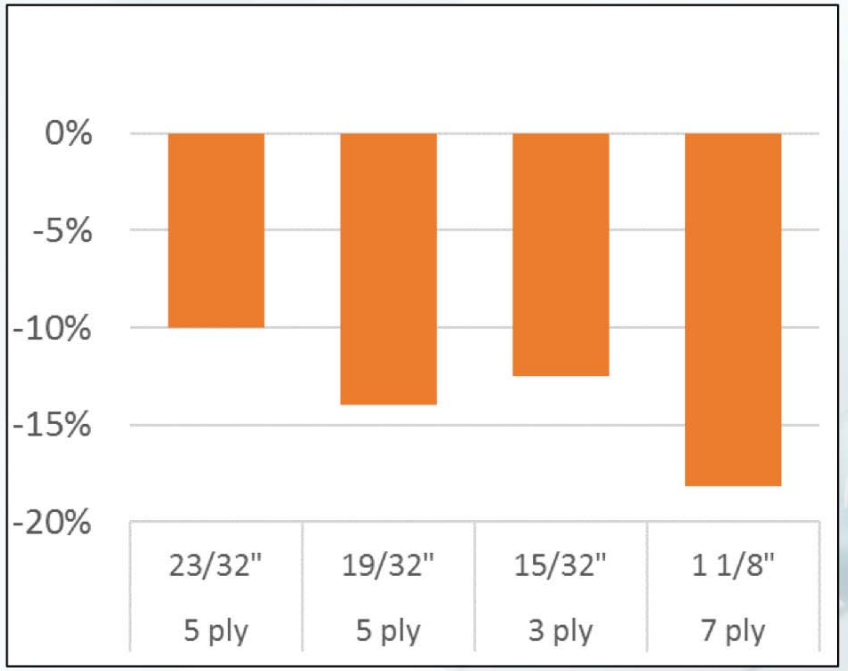
	Douglas Fir	Southern Yellow Pine	LVL
Annual Resin Reduction	3% - 9%	Up to 8%	Up to 5%

RESI-BOOST

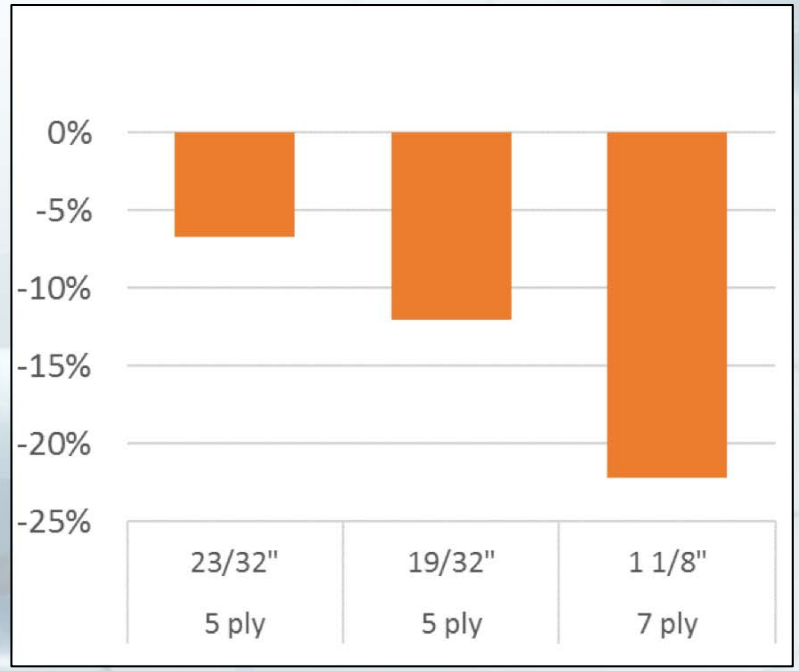
RESI-BOOST® Adhesive Technology
Decreased Cycle Time

Georgia-Pacific Chemicals

Reduction in hot press time



Douglas Fir



Southern Yellow Pine

	Douglas Fir	Southern Yellow Pine
Press Time Reduction	10% - 18%	6% - 22%

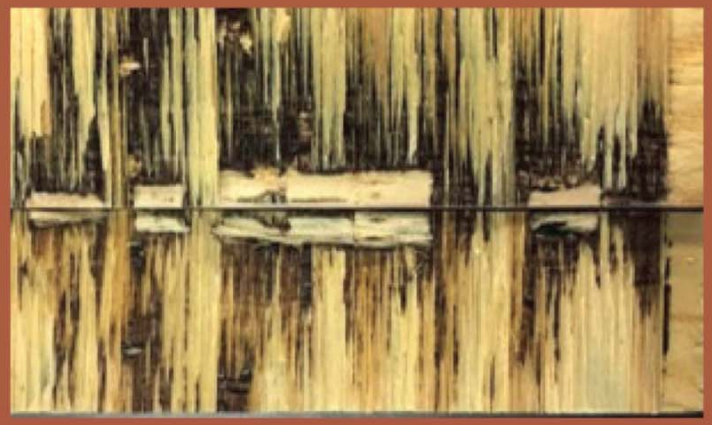
RESI-BOOST

RESI-BOOST® Adhesive Technology
Increased bonding around knots and juvenile wood

Georgia-Pacific Chemicals

DEMONSTRATED BENEFITS IN LABORATORY EVALUATION

CONTROL
Standard spread rate
4.5 min Press Time
7% Veneer



RESI-BOOST ADHESIVE TECHNOLOGY
20% reduction in Spread Rate
4.5 min Press Time
7% Veneer

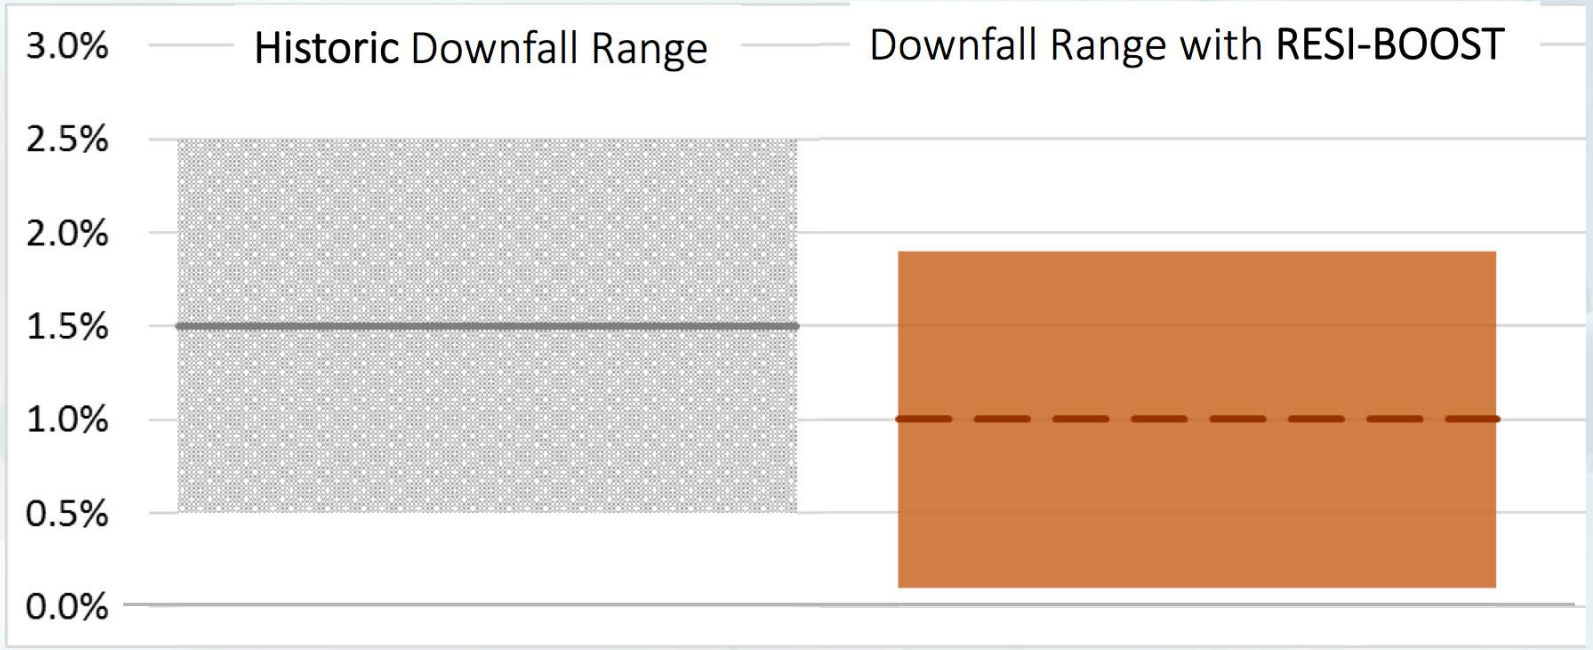
Equivalent amount of wood failure in RESI-BOOST Adhesive technology versus Control depicts strong resin bonds at lower glue spread

RESI-BOOST

RESI-BOOST® Adhesive Technology Downfall Reduction

RESI-BOOST® Technology reduces Mill Downfall

- Douglas Fir
  - 0.2% reject reduction
- Southern Yellow Pine
  - 0.5% reject reduction



Illustrative example of shift in average annual downfall

RESI-BOOST

RESI-BOOST® Adhesive Technology Customer Value Example

Process	RESI-BOOST® Adhesive Technology Example Value $M
Plywood (DF)	Up to $ 250 per mill
Plywood (SYP)	
LVL	
Current Industry Value	$ 1 029

Value = Press Time + Spread Reduction + Downfall Reduction

RESI-BOOST® Adhesive Technology
Additional Benefits

Pre-press consolidation ☒ Reduced tendency for dry out

Removing excess water from the glue increases its tackiness.

The prepressed panels hold their consolidation better & longer, allowing stronger glue bonds to form throughout the panel during hot pressing.

RESI-BOOST

RESI-BOOST® Adhesive Technology
Product Application

Georgia-Pacific Chemicals

Why isn't every mill running this product?

- Training
- Knowledge sharing
- "It changes the way we make plywood"
  - Quality Manager at a premium plywood facility
